Thanks for the request & testing!

aussie BIM guru

Catch up on part 1...

The screenshot shows a video player interface. In the top-left corner, there is a small video feed of a man with glasses. The main content area displays a presentation slide. The slide features the 'aussie BIM guru' logo on the left, which includes the text 'aussie BIM guru' and 'Email me at aussieBIMguru@gmail.com'. Below this is an 'AUTODESK CERTIFIED PROFESSIONAL' logo. The central part of the slide has a large 'AG' logo. To the right of the 'AG' logo is a colorful Dynamo logo. Further right is a diagram showing a hexagon with the number '1' inside, connected by lines to other hexagons. The title 'Tag All in View Using Dynamo' is at the bottom of the slide. The video player controls at the bottom show a progress bar at 0:10 / 22:04. Below the video player, the video title 'Tag All in view (refined) using Dynamo!' is displayed, along with 'Private' status, '1 view', and 'Uploaded on Sep 18, 2019'. There are also icons for likes (0), comments (0), share, save, and a menu.

An issue with the script!

It tags what Dynamo sees

aussie BIM guru

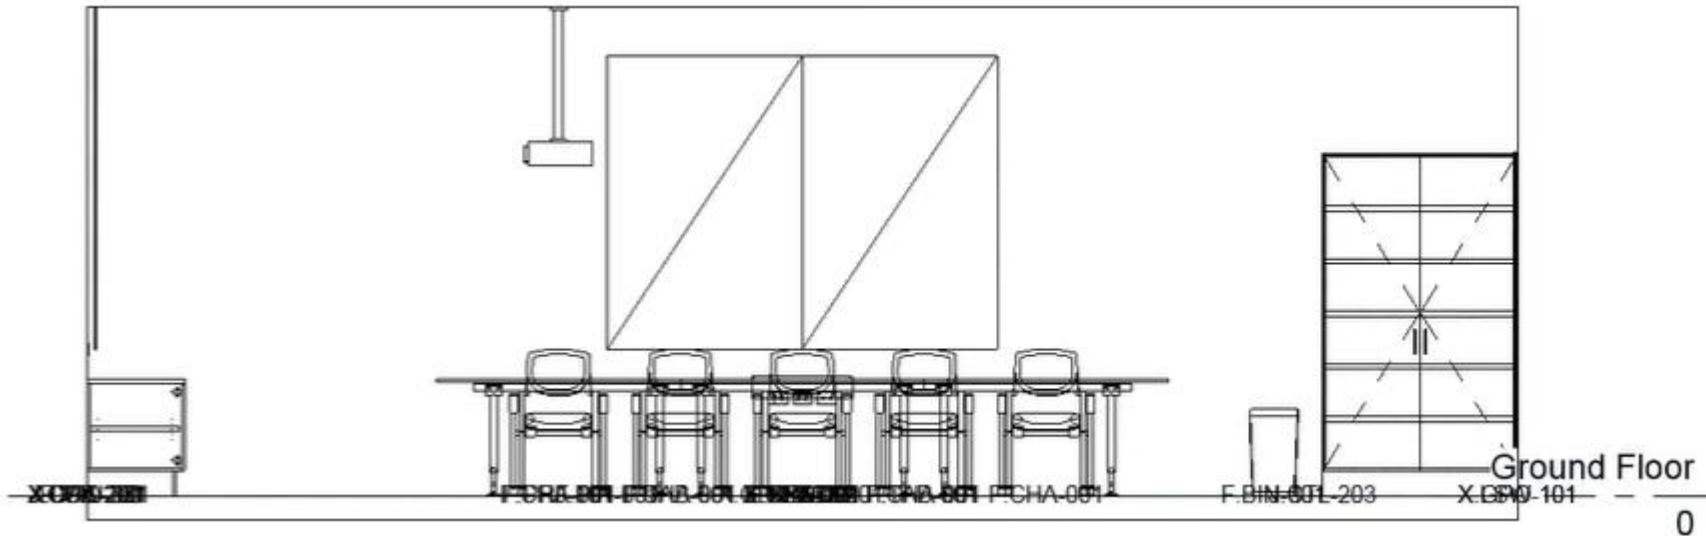

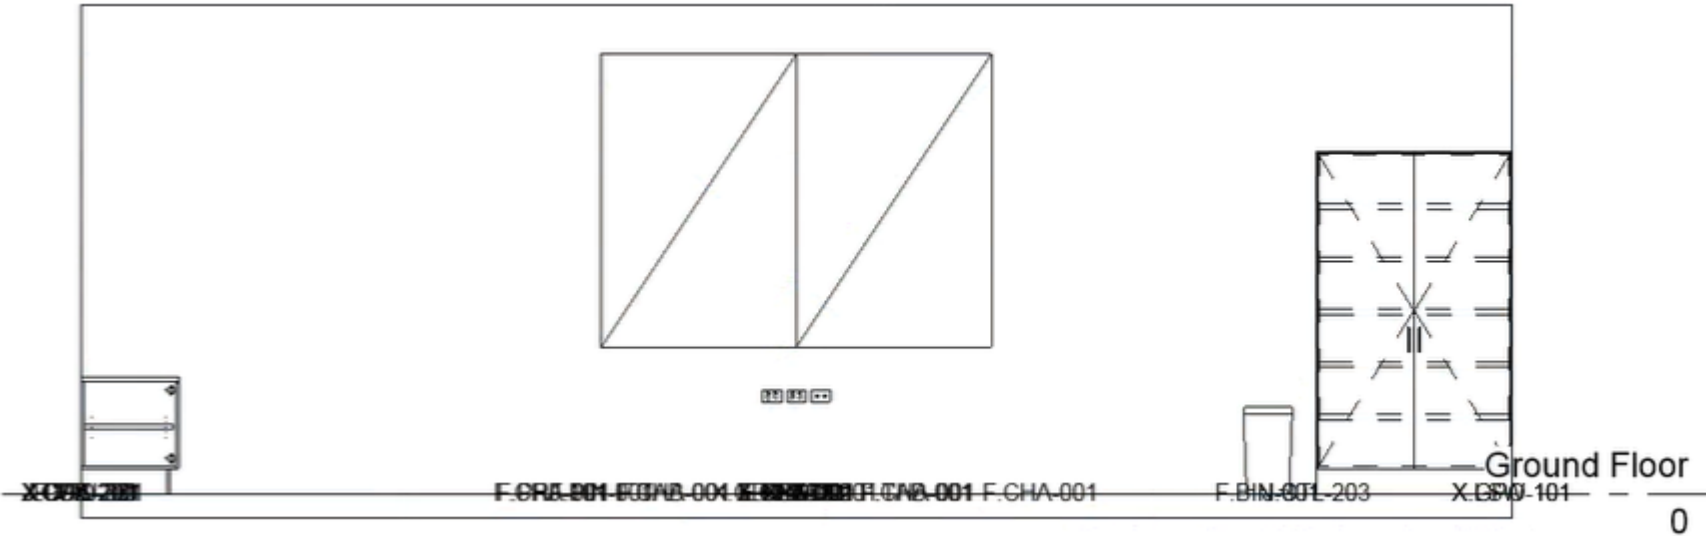

aussie BIM guru

Wut

aussie BIM guru

Dynamo sees all

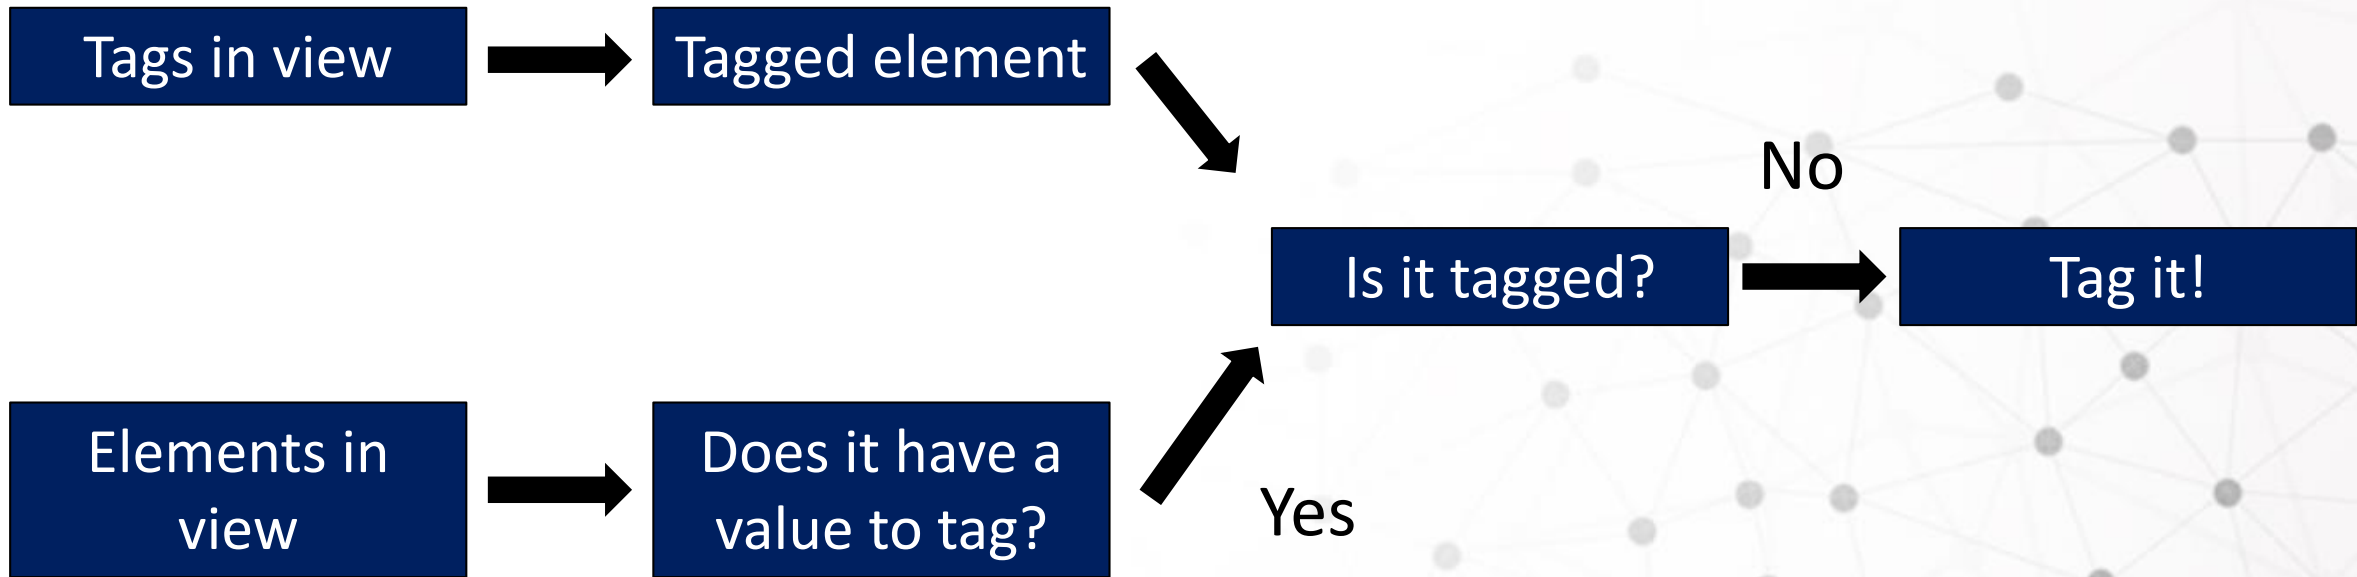

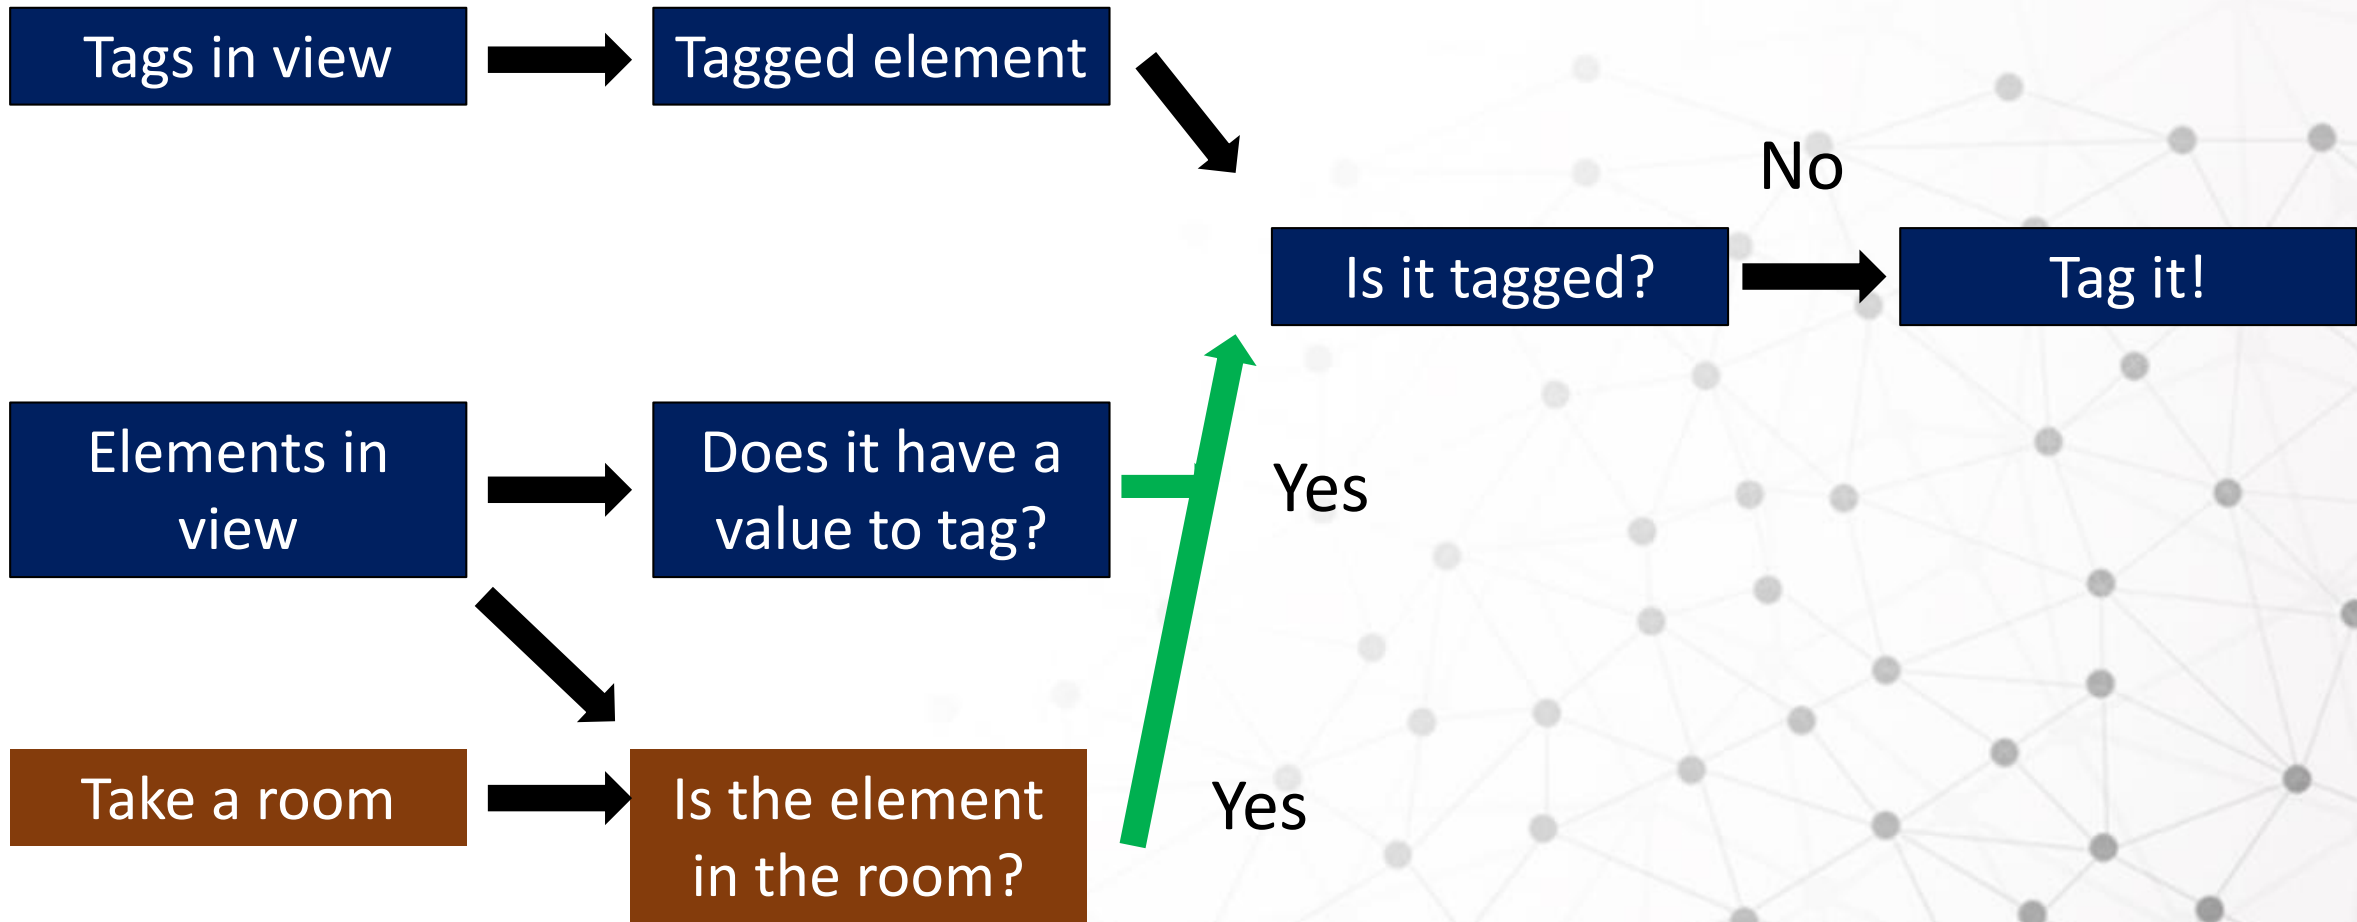

Time to adjust our script

To a selected room only!
