

**Who do I follow
in AEC?**

Video focus:
Who do I follow

Purpose of this video

- Help expand your network
- Promote other's content and work
- I get asked this a lot!

How do I
follow
people?

How do I
follow
people?

The problem
with...

- Numbers game
- Life coaches
- Influencers
- 'Facebook-esque'

Blocking the influencers

Followers

Choose who can follow you and see your public updates

Blocking

See your list, and make changes if you'd like

You're currently blocking 147 people:

A solution...

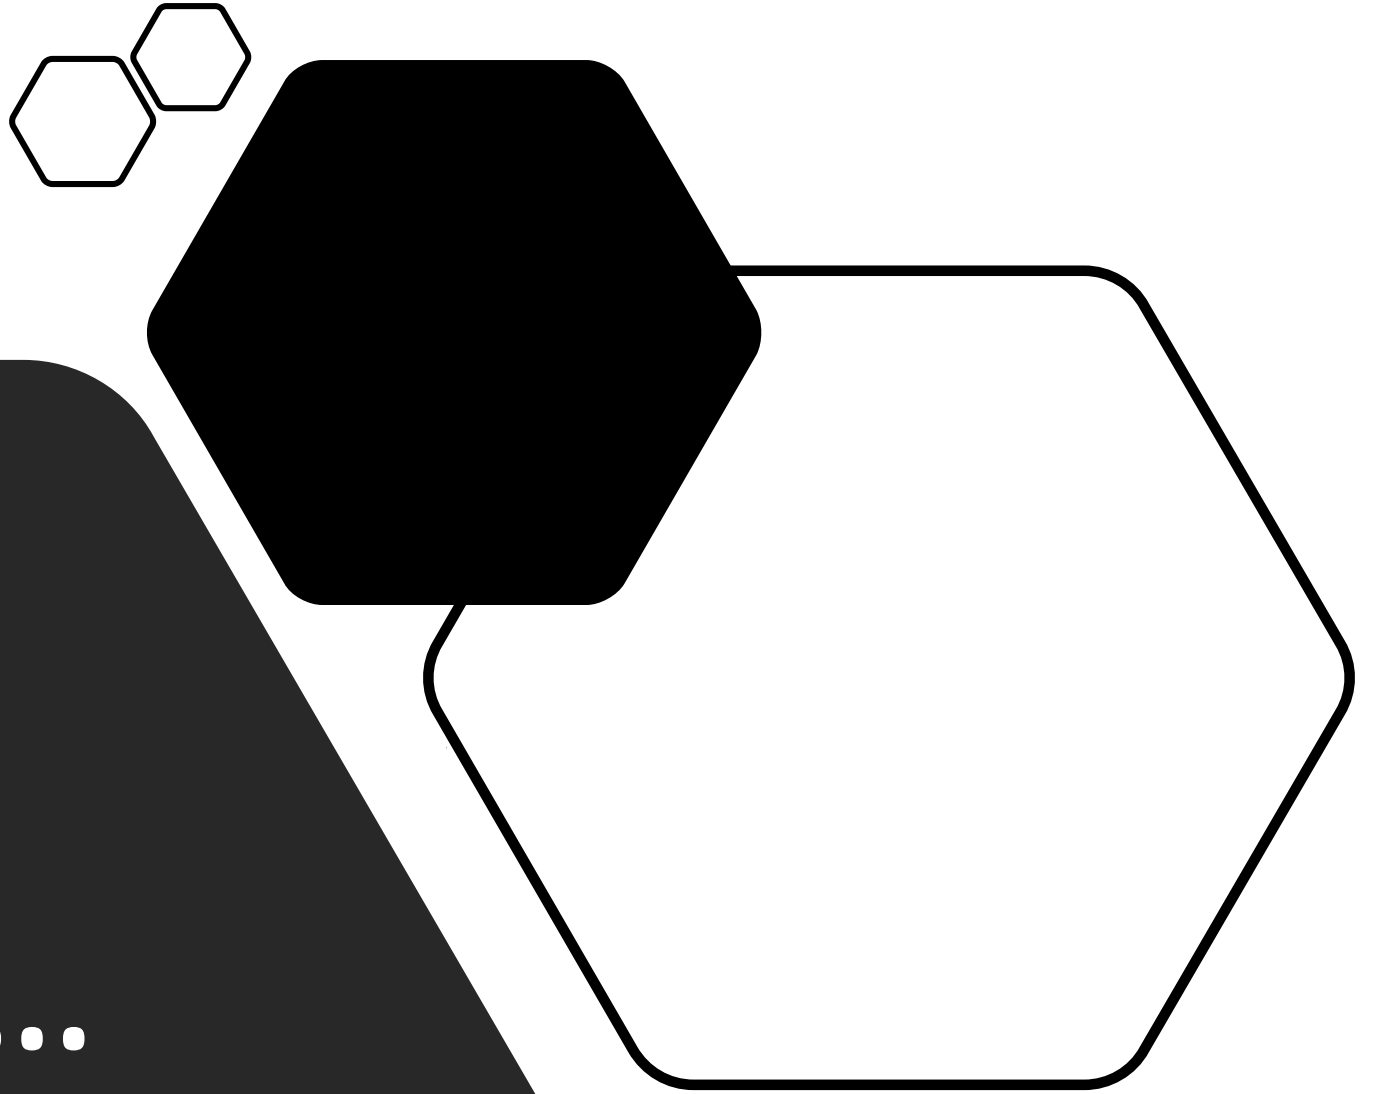

- It's alive!
- 'Mute' the spam
- Follow at your own will
- Less of a connections game

If I miss you, sorry!
Lots of names to recall

Without
further ado...

Ideate

The banner features a green header with the text "Ideate BIMLink – Precise Revit Data Control" in white. Below the header, a paragraph of text describes the software's capabilities. At the bottom, a diagram illustrates the data flow between Autodesk Revit (represented by a 3D model of a building) and Microsoft Excel (represented by a spreadsheet icon). Green arrows indicate the direction of data transfer. The Revit interface shows a 3D model of a building, and the Excel interface shows a spreadsheet with data. The Ideate BIMLink logo is visible in the bottom right corner of the diagram.

Ideate BIMLink – Precise Revit Data Control

With Ideate BIMLink, all Autodesk Revit users can push large amounts of information from a Revit file into Microsoft Excel and pull volumes of precise BIM data back into Revit with speed, ease and accuracy.
