

Revit Door Families

Part 6: Swapping Hardware

Revit Doors Family 6:

Swapping Hardware

Running Order

Part 1: Frames

Part 2: Hinges

Part 3: Leaf

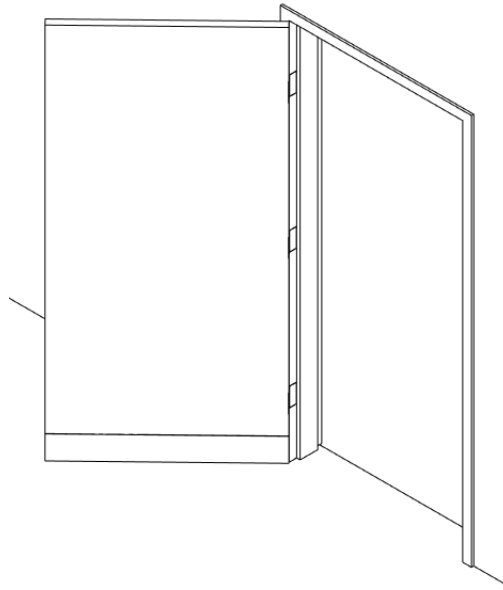

Part 4: Hardware

Part 5: Reference hosting

Part 6: Swapping hardware

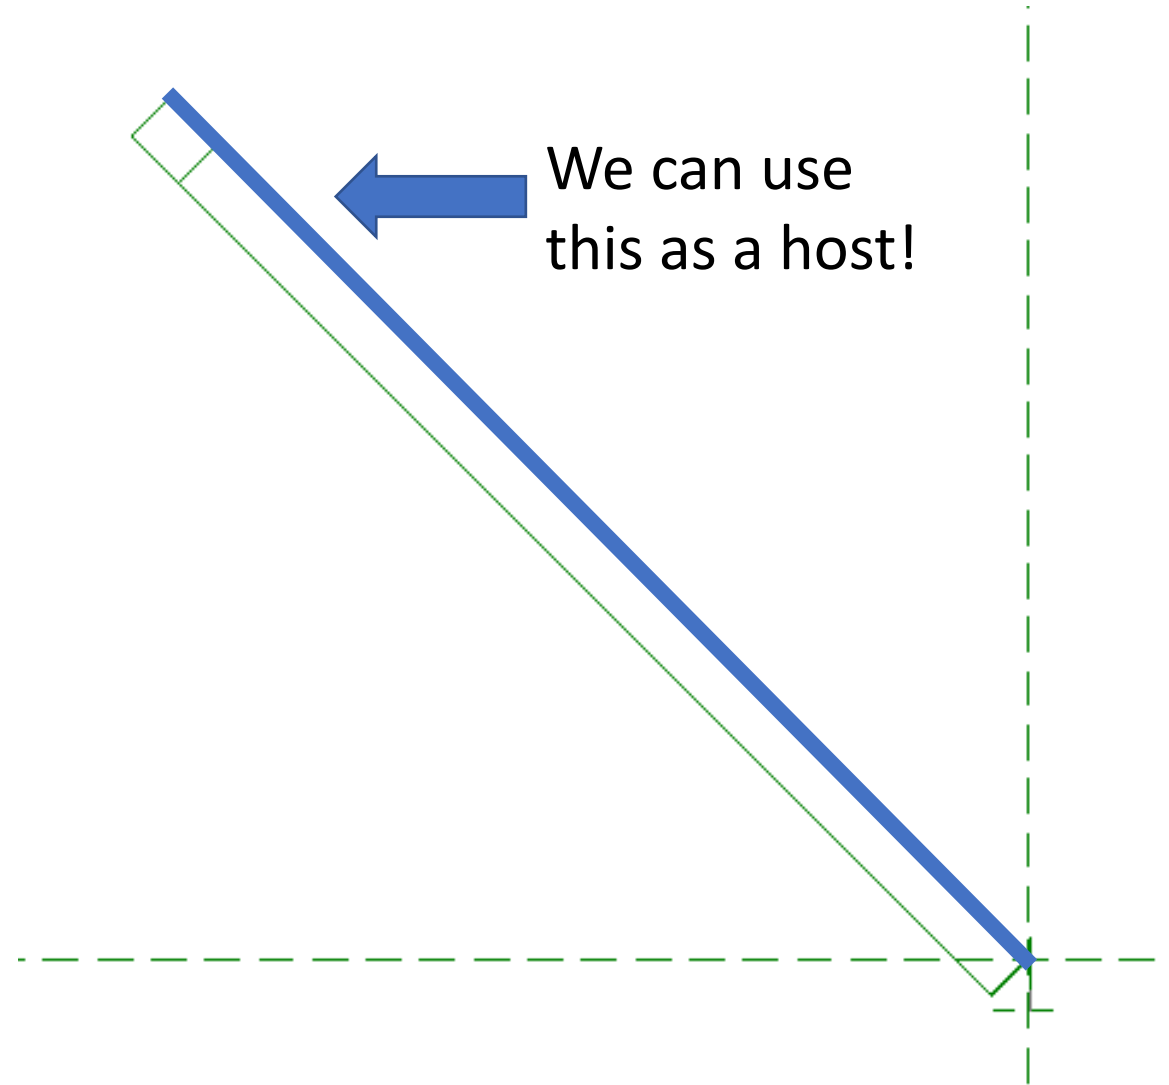

Part 7: 2D Swings

Previously

- Door hinges
- Door frames
- Door leaf
- Door hardware
- New system

Now we have
a new
method

New challenge

What if we want to **switch** hardware sets, leaf types, closer sets etc.?

Usually these aren't **type based** changes.

The answer

Type label parameters!

Let's get
started!

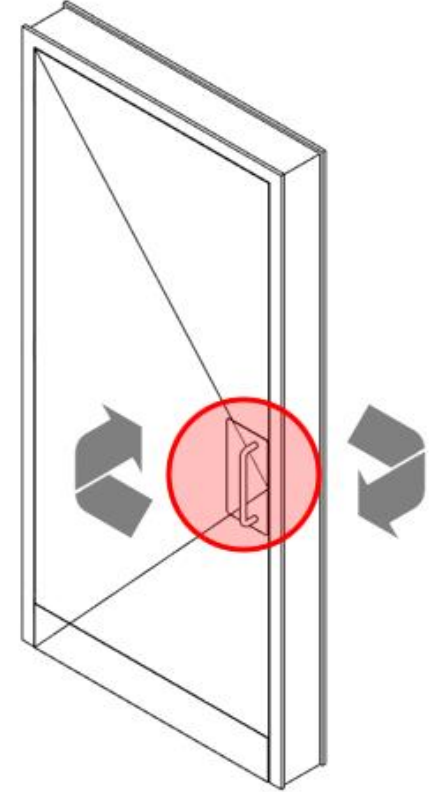

I'll be using

Revit 2020
Build 2.2
