Great presentation!

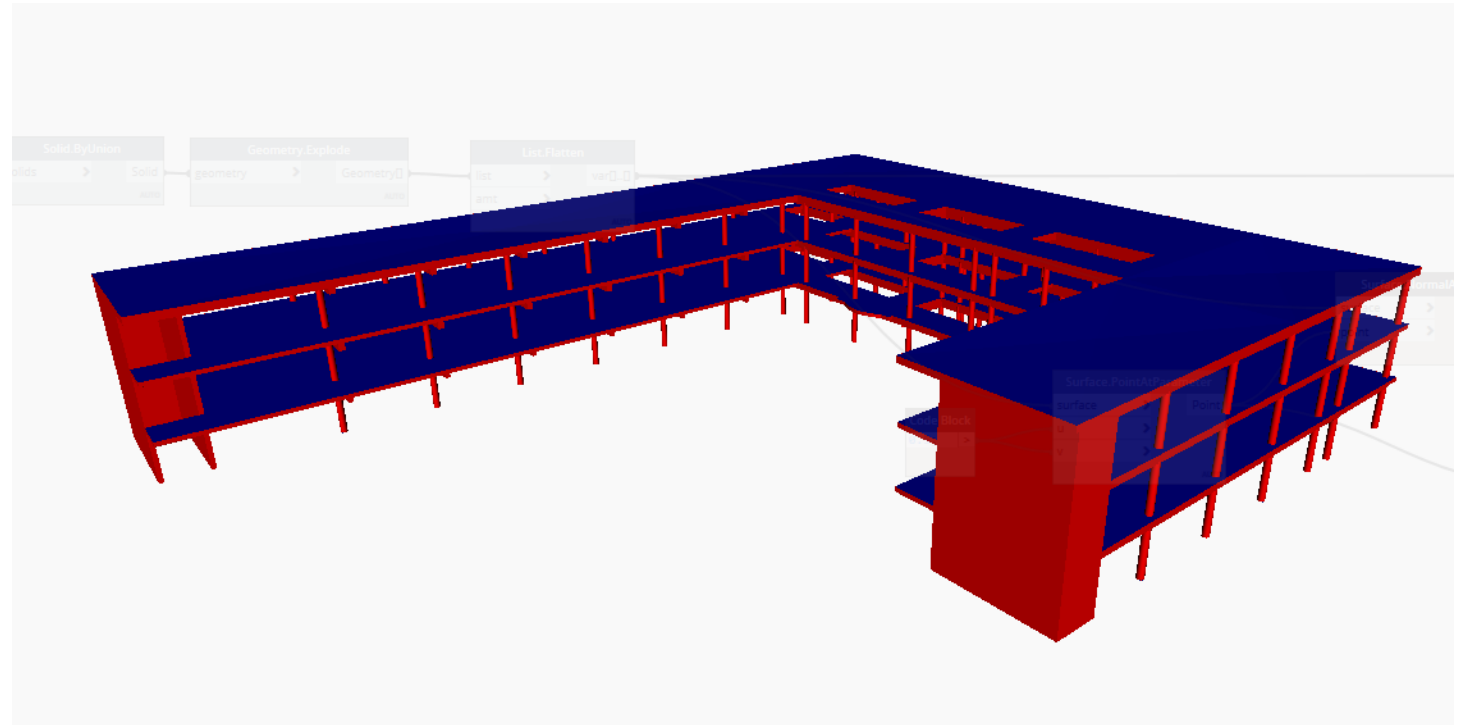

A short question, which is the best workflow to quantify formwork?, it is modeling its geometry with dynamo, painting surfaces, or just by the geometrical dimensions of the cast in place concrete?

Disclaimer

I am not a structural engineer
I am not a formwork expert

But this might help!

The method

Sometimes there will be
geometry bugs and issues.

Versioning

Revit 2020.2.2

Dynamo 2.3.0

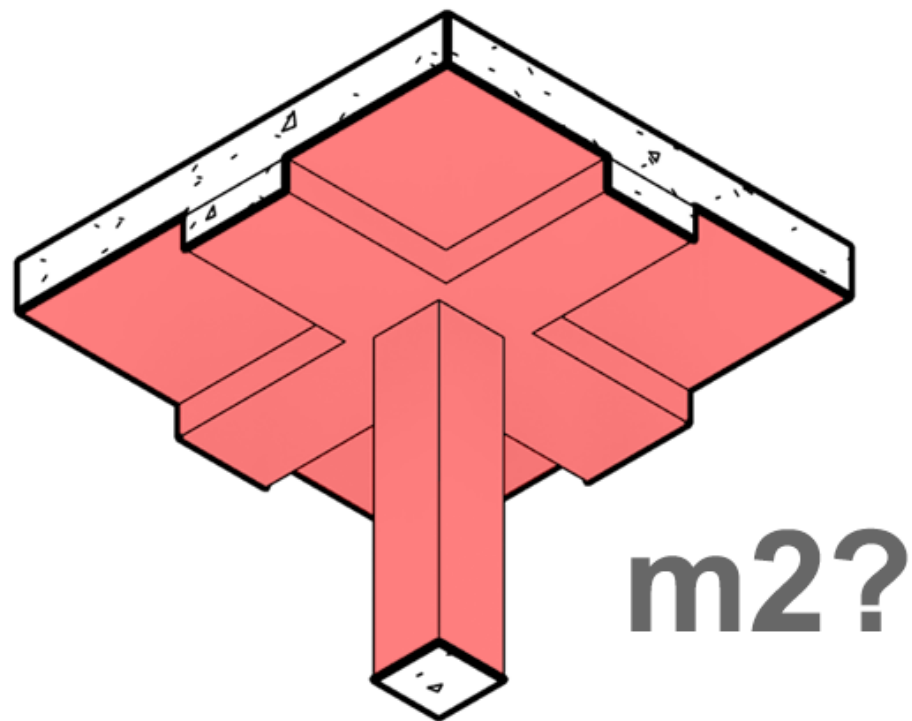

Without further ado
