

CREATING CUSTOM **ENSCAPE** ASSETS IN **REVIT**

BY THE AUSSIE BIM GURU

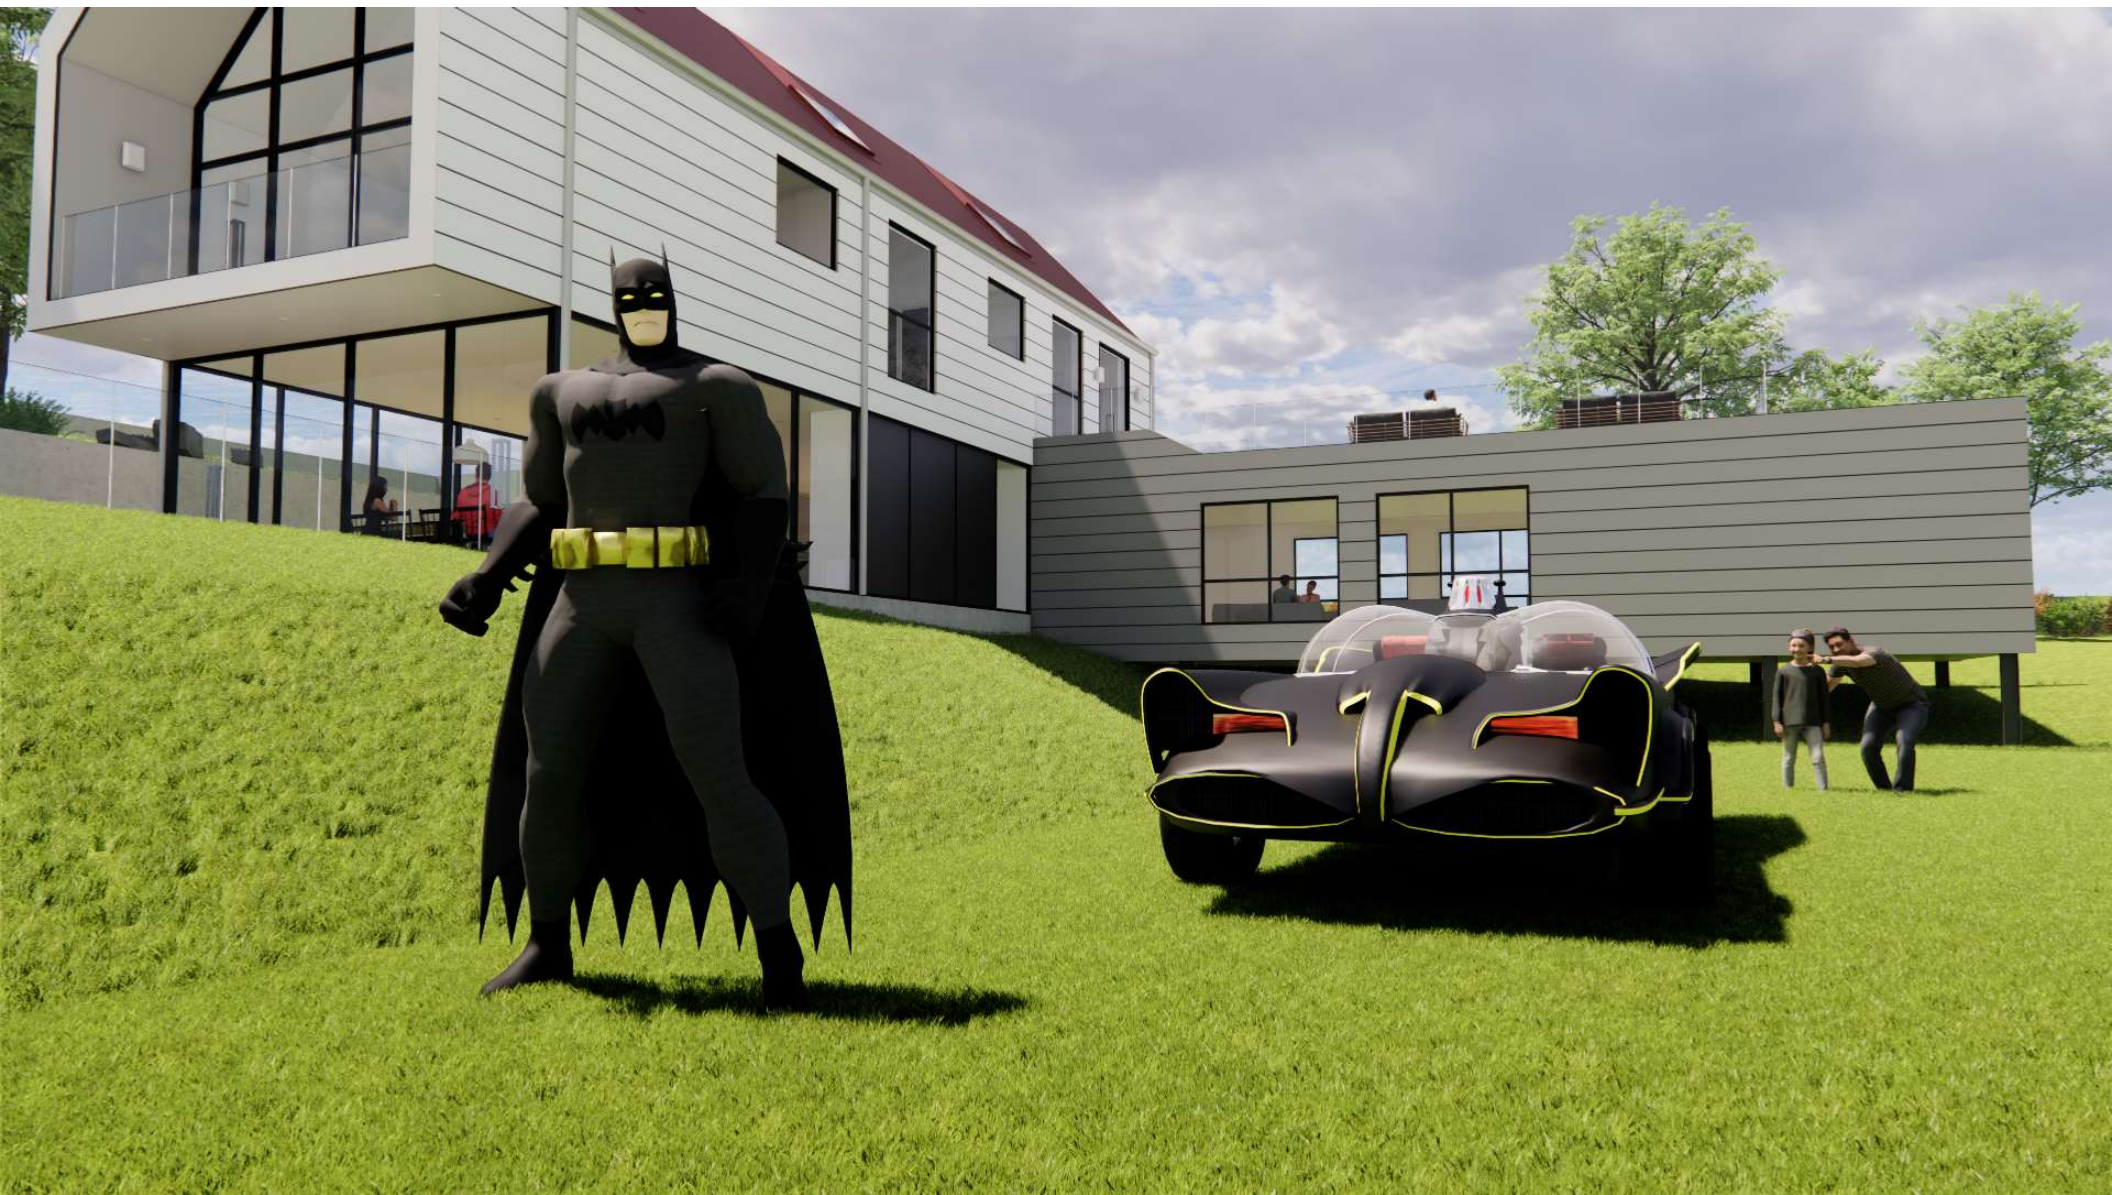

Enscape is a real-time rendering plugin for many popular programs like **Revit, Sketchup, ArchiCAD and Rhino 3d**.

Whilst it isn't free, it is one of the best tools of its kind. Great value for money!

Enscape uses **3D proxy families** in Revit, which it swaps for high resolution 3D objects when rendering.

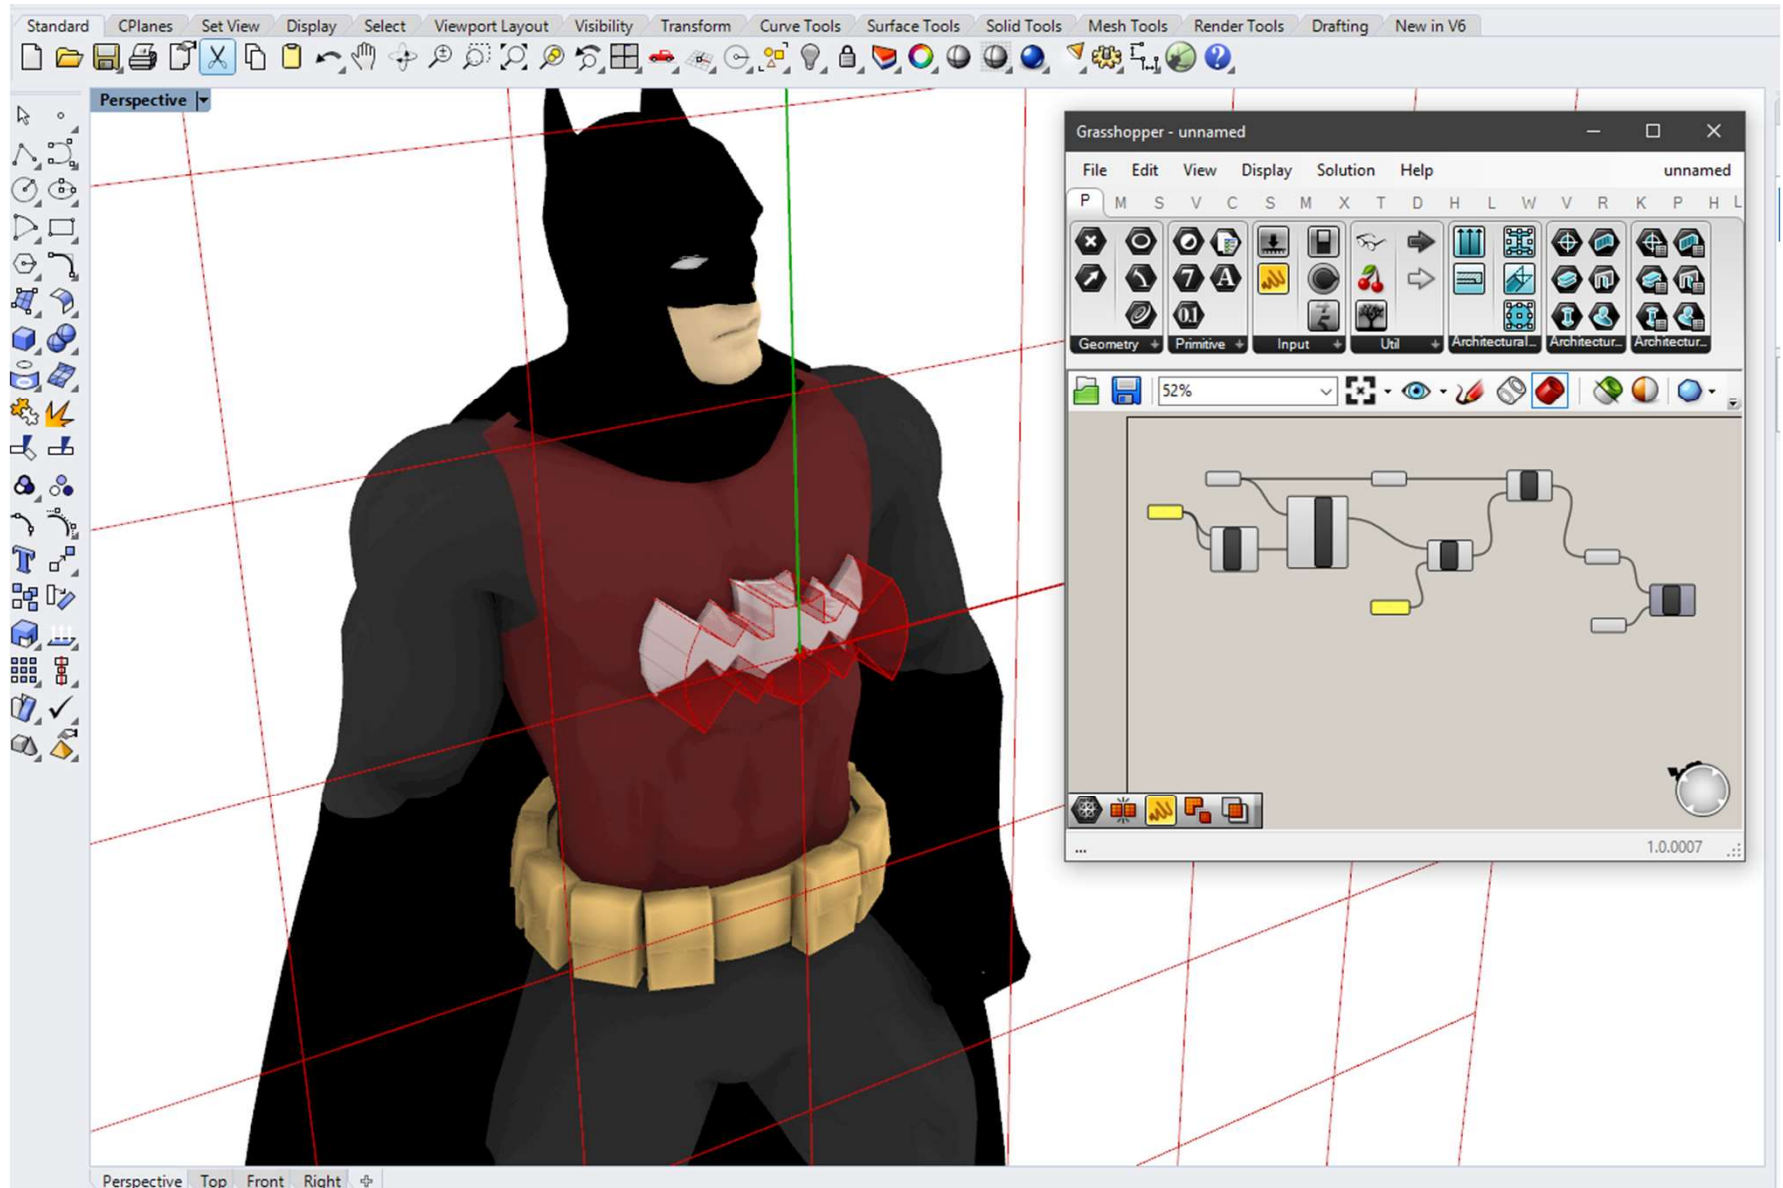

In version 2.9, we can now load in our own **custom assets!**
