

# LIFE SAFETY PLANS IN **REVIT**

BY THE AUSSIE BIM GURU

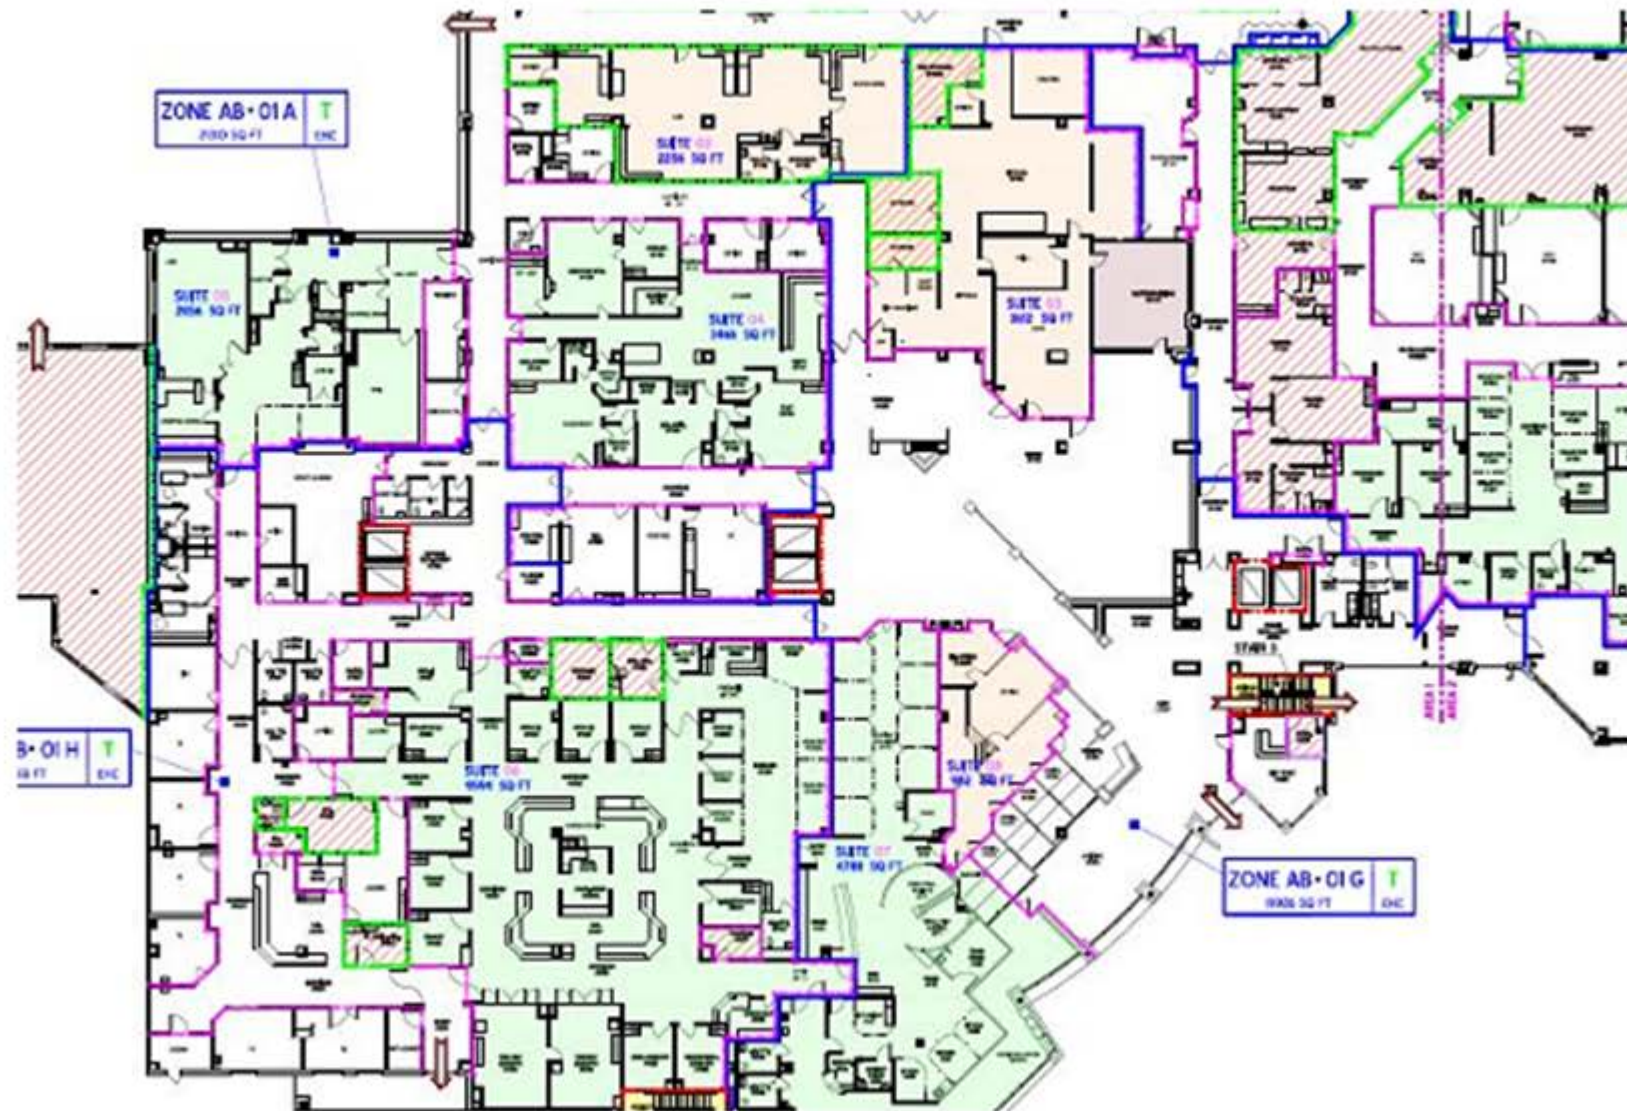

**Charles Ball** 24 minutes ago

Could you do a video about how to show wall ratings on life safety plans? Our architects are using CAD files linked into the model for those plans. The answer can include using Dynamo if needed. Please and thank you.

# Thanks for the request

The image is an isometric architectural rendering of a modern building complex. The main structure is a large, rectangular building with a flat roof, divided into several sections by internal walls. The building's facade is composed of a grid of windows. In the center of the building is a courtyard area. To the left of the main building is a parking lot with several parking spaces. The surrounding area includes some trees and a road. The text "Today's model" is overlaid in the center of the image.

Today's model
