Calculate Excavation
using **Dynamo**

Thanks for the request

I have a question for you, so I got a job from Portugal modelling a house from a CAD file, he now wants me to calculate the volume for how much excavation they need to do

I've been trying to find videos explaining how to do it but I only found videos on cut and fill, is it the same?

Custom nodes

Versioning

Revit 2020.2.2

Dynamo 2.3.0

Without further ado
