RFI Markers
using Dynamo

Dynamo for RFI Communication

Thanks for the idea!

Ah... I have an idea for how you could streamline this using Dynamo. I'll make a video tutorial for it as I think it will help others too.

James' current workflow

- Place text/hatch on plans
- Mark with RFI number
- Write commentary separately

Alternative workflow

- 3D RFI Markers with data
- Dynamo to take out data
- Dynamo to return markers

Anyway...

Let's get started!
