

Revit Door Families

Part 4: Hardware

Revit Doors Family 4:

Hardware

Thanks for
the request!

Wojciech Turek  • 3 weeks ago

Would be worth to see a tutorial for how to build a parametric door type with 2d aluminium profiles and some nested for example panic bar and hinges families
Would you be interested to create something like that for us?

Running Order

Part 1: Frames

Part 2: Hinges

Part 3: Leaf

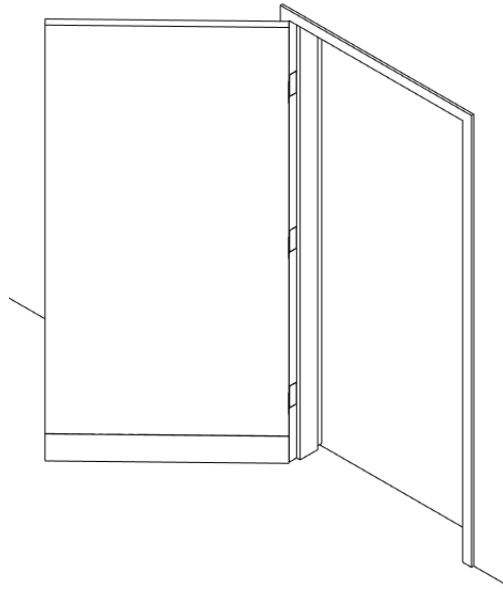

Part 4: Hardware

Part 5: Reference hosting

Part 6: Swapping hardware

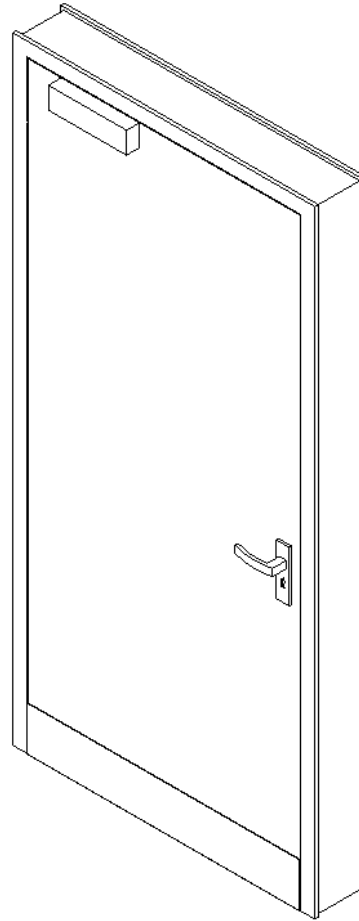

Part 7: 2D Swings

Previously

- Revit angular constraints
- Re-using components
- Door leaf
- Door protection

The next step

- Face hosting
- Handles
- Optional Pushbar
- Closers

Let's get
started!

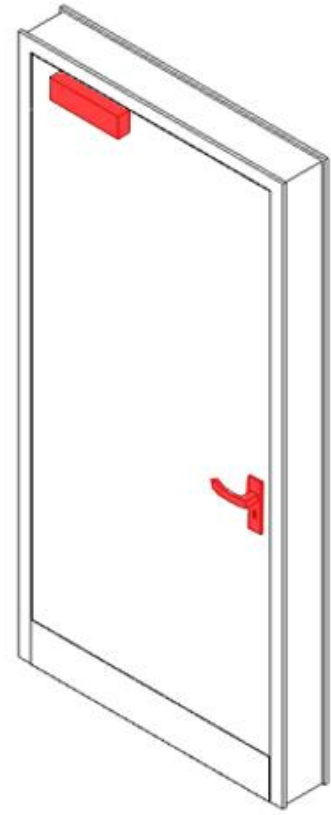

I'll be using

Revit 2020
Build 2.2.1

Files are on
github
