

Revit Door Families

Part 2: Hinges

Revit Doors Family 2:

Hinges

Thanks for
the request!

Wojciech Turek  • 3 weeks ago

Would be worth to see a tutorial for how to build a parametric door type with 2d aluminium profiles and some nested for example panic bar and hinges families
Would you be interested to create something like that for us?

Running Order

Part 1: Frames

Part 2: Hinges

Part 3: Leaf

Part 4: Hardware

Part 5: Panels

In the
previous
video

- Double/single rebate
- Parametrically sized
- Recognizes wall thickness
- Face offset controls
- Future offset for hinges

The next step

- Hinge set (array)
- Angle is adjustable
- Impact on frame width
- View visibility

Let's get
started!

I'll be using

Revit 2020
Build 2.2.1

Files are on
