Rhino.Inside Revit video tutorials by Gavin Crump

RECENT POSTS

### What is Rhino Inside?!

Rhino.Inside\* is an open source **Rhino WIP** project which allows Rhino and Grasshopper to run **inside** other 64-bit Windows applications such as Revit, AutoCAD, etc.

**Gavin Crump**, BIM Manager at Crone Architects, is raving about Rhino.Inside —and producing a series of tutorials on bridging Rhino and Revit together.

Using Grasshopper in Revit is a massive breakthrough for computational designers. Rhino.Inside Revit gives you access to Rhino/Grasshopper within Revit.

In this first tutorial, Gavin covers accessing Revit elements via Grasshopper, then baking them into a Rhino model.

More tutorials are in Gavin's future agenda, including reading and setting parameter values in Revit.

You can download **Rhino.Inside** (free if you have a Rhino 6 license).

***Rhino Inside: Revit Elements into Rhino (Part 1)***
