**Learn Dynamo**
Conclusion
That's all folks!

We made it...

The end of the beginning!

for you and Dynamo ☺

aussie BIM guru

aussie BIM guru

Where to now?

1. Experiment/practice
2. Build <u>your</u> first script
3. Educate/inform others
4. Join the community
5. Advanced learning

aussie BIM guru

Experiment/Practice!

I've merely given you the tools
Practice will make perfect

Try out different nodes
Try out custom packages

aussie BIM guru

Custom Packages

Persevere

Be ready for frustrations

Be ready for bugs

aussie BIM guru

Build your first script

When you're ready...

Find a problem <u>YOU</u> need to solve
Force yourself to solve it
Using Dynamo

aussie BIM guru

My first problem

Fully automated:

Number doors by room

Sequence doors by room

Make exception for façade doors
(clockwise or CCW)

aussie BIM guru

If it is too hard

Don't feel like you failed

It took me 5 times to get it!

FAILURE IS NOT THE OPPOSITE OF SUCCESS IT'S PART OF SUCCESS

aussie BIM guru

Educate

In your office

In your area (user groups etc.)
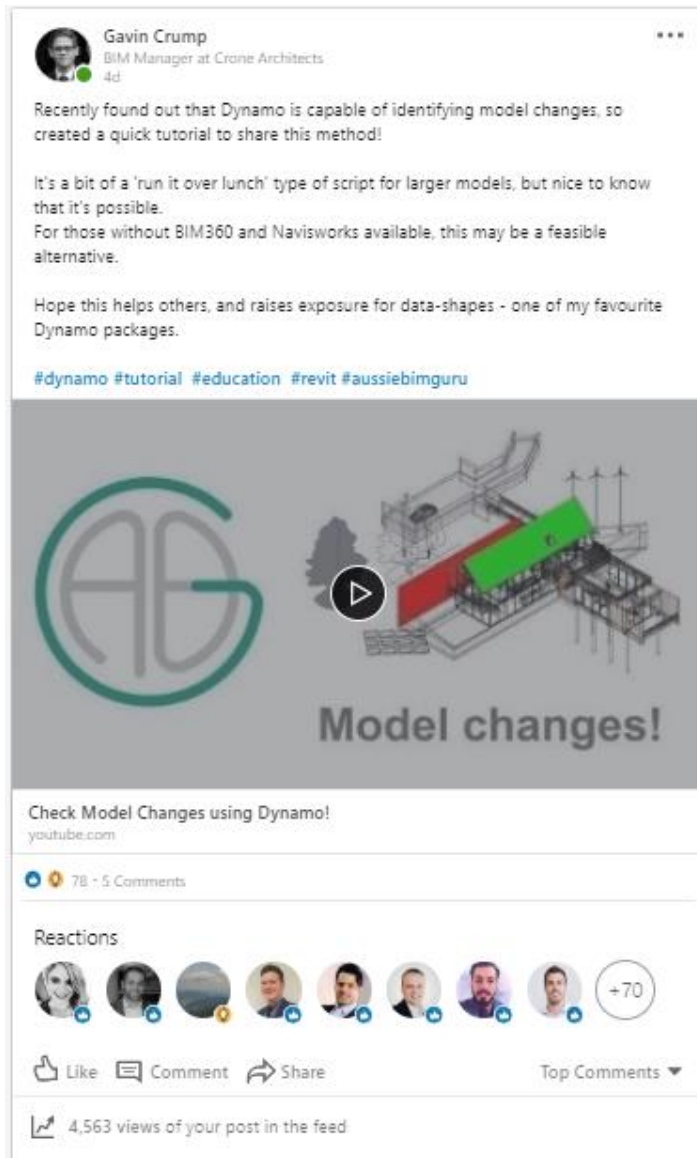

Share your victories

Start a Youtube Channel?

Inform

Share ideas

Use networks
Such as Linkedin

Consider conferences

Gavin Crump
BIM Manager at Crone Architects
4d

Recently found out that Dynamo is capable of identifying model changes, so created a quick tutorial to share this method!

It's a bit of a 'run it over lunch' type of script for larger models, but nice to know that it's possible.
For those without BIM360 and Navisworks available, this may be a feasible alternative.

Hope this helps others, and raises exposure for data-shapes - one of my favourite Dynamo packages.
